

# Crescent Harbor Float Replacement Project

## Public Impacts: January 25-31

Turnagain Marine Construction (TMC) will build a concrete abutment for the new Crescent Harbor Ramp 3. This will require Sea Walk pedestrians to detour as shown in red for the duration of this work. Please comply with temporary detour signs.

Ramp 3 work zone. Parking lot will be closed for the duration of this work.

Also during this time, access to Floats 5, 6 and 7 will be via Ramp 2, as shown in blue. TMC workers will occasionally need to stop pedestrians in the vicinity of Ramp 3 when hazardous work is under way. Thank you for your patience.

TMC will be removing demolished materials from the harbor with a crane stationed here. Please respect temporary traffic control signs.
